

NEW: SPOTLIGHT TYPE HA-SW 1A

To ensure a proper illumination of underground instalations (especially transport and winning machinery), the application of this type of reflector conforming with all requirements of Directive No 94/9/EG (ATEX) is highly recomended.

Features:

- high illumination efficiency of the halogen fluorescent lamps,
- two operating voltages ranging from 42V to 1000V,
- possibility to choose the luminous flux (pointwise / broad – flux),
- cable inlet or socket – contact coupling,
- possibility to assembly on rotary and deflecting bracket with vibrations absorber.
